Nothing should prevent your gaming experience if... I've been playing this game for years since I've been I do not know like 7 and im currently 12, and I want to give you guys some ideas that I really want to spread and I hope they are added to the new cyberpunk season for the game.1- Gem to the credit conversion: Yes, it's surprisingly strange and can be unstable for you guys since theres gonna bd a lot of pay for the winners put there, but year me, for every 5 gems, its converted 300 credits to make things balance, if its 100 credits per gem, it will throw it out of balance and everyone will just buy it all the time. Pssst, btw the current account im using is a separate account from my old one, but on a different device since the other was not the same brand, so that's why I want to do ... drumroll please 2- Merger account: You You merge your old account with your new one to create the nostalgic smell of your childhood or maybe you old account as well. That would be a great thing to add. ... And now for my last and that the last one is ... I could use a new weapon, I want to call it Nuclear Stimulator and the look on it is your whole idea, but the effect should be slow down the enemy, Random effect and, gadget blocker ... help it's all the things I can think of right now, it was fun to play your game and brings me back years ago so thank you for the great moments you play me at the time, a lot of love and goodbye ... I love this game, it's great and they've added a bunch of new things. Some of the things they added like the new world is cool and anything but other things like trophies isn't. First of all the TROPHEES you lose like 30 or 33 trophies when you lose a match, but when you win the game, you only get like 20. Second, you get players paired with higher levels than you! These players have things you don't even know existed because you don't unlock them! Players have God armor and God's guns and it basically leads you to an automatic loss because it rages other players and when you want to see how many players are on your team, you discover that they are all gone. Then there is the main problem, I do not know if I am the only one with this problem, but there is this thing on the new world. This new world is world 4 in the world there is something that tells you that you need 6 stars to unlock guess what? I can't play in the new world! Before world 4 I finished all the other worlds and I have over 6 stars in all worlds and I still can't play the game I've searched all over the internet to see what to do, but I can't find anything but videos of YouTubers playing around the world. I'm really sad that I can't play in the world because I was really looking forward to playing there. I hope you solve the problem or please tell me if I'm just being dum and that there's something I need to do, but by then I'll just be sad :(I love this game. It's an amazing experience, and it's a good way to pass the time. I am very happy that you can win extra trophies after a fight to get more points and kills. The idea of rewarding a player even after they have won with even more trophies is great. And how if you do better than your team, you can lose fewer trophies instead of the classic 30 makes it even more fun. My problem with the game is all the crazy spenders of money. Personally, I threw a few dollars into it. But the fact that when new weapons freed, more expensive and powerful than the old ones, I can't follow those who pour so much money into the game. I remember how the Automatic Peacemaker was one of the best weapons in the game. I worked for the gun, and it paid off. Then the game had major updates and my favorite weapon, I spent over a year buying equipment to help her be better and training with her, was useless. New weapons such as Anti-hero rifle took over the spotlight, and even the most powerful weapon in the game, the prototype, was replaced by a new pistol. And later came the Peacemaker Champion, which we also ended up nerfed. I just want to be able to use my favorite weapons I'm good with without having to lose every time. We all know that losing time and time again is not fun. Thanks, and I hope the developers read this!
